

# Bridge Management 2014 Administrative Overview

Bridge Management Users Group Meeting  
Rapid City, SD

# FY2013 Licensees

# FY2014 Licensees

# FY2013 Revenue

# FY2014 Revenue

# FY2013 Expenditures

# FY2014 Expenditures

# AASHTO Administrative Overhead

- **AASHTO Administration & Overhead**
  - Staff salaries, benefits, and overhead for AASHTO support staff
  - Contracted Project Manager
  - Proportional share of SCOJD, T&AA indirect costs and legal services
- **Technical and Applications Architecture Task Force**
  - Technical resource for SCOJD and product task forces
  - Develop and maintain software standard
  - Perform Annual QA Reviews

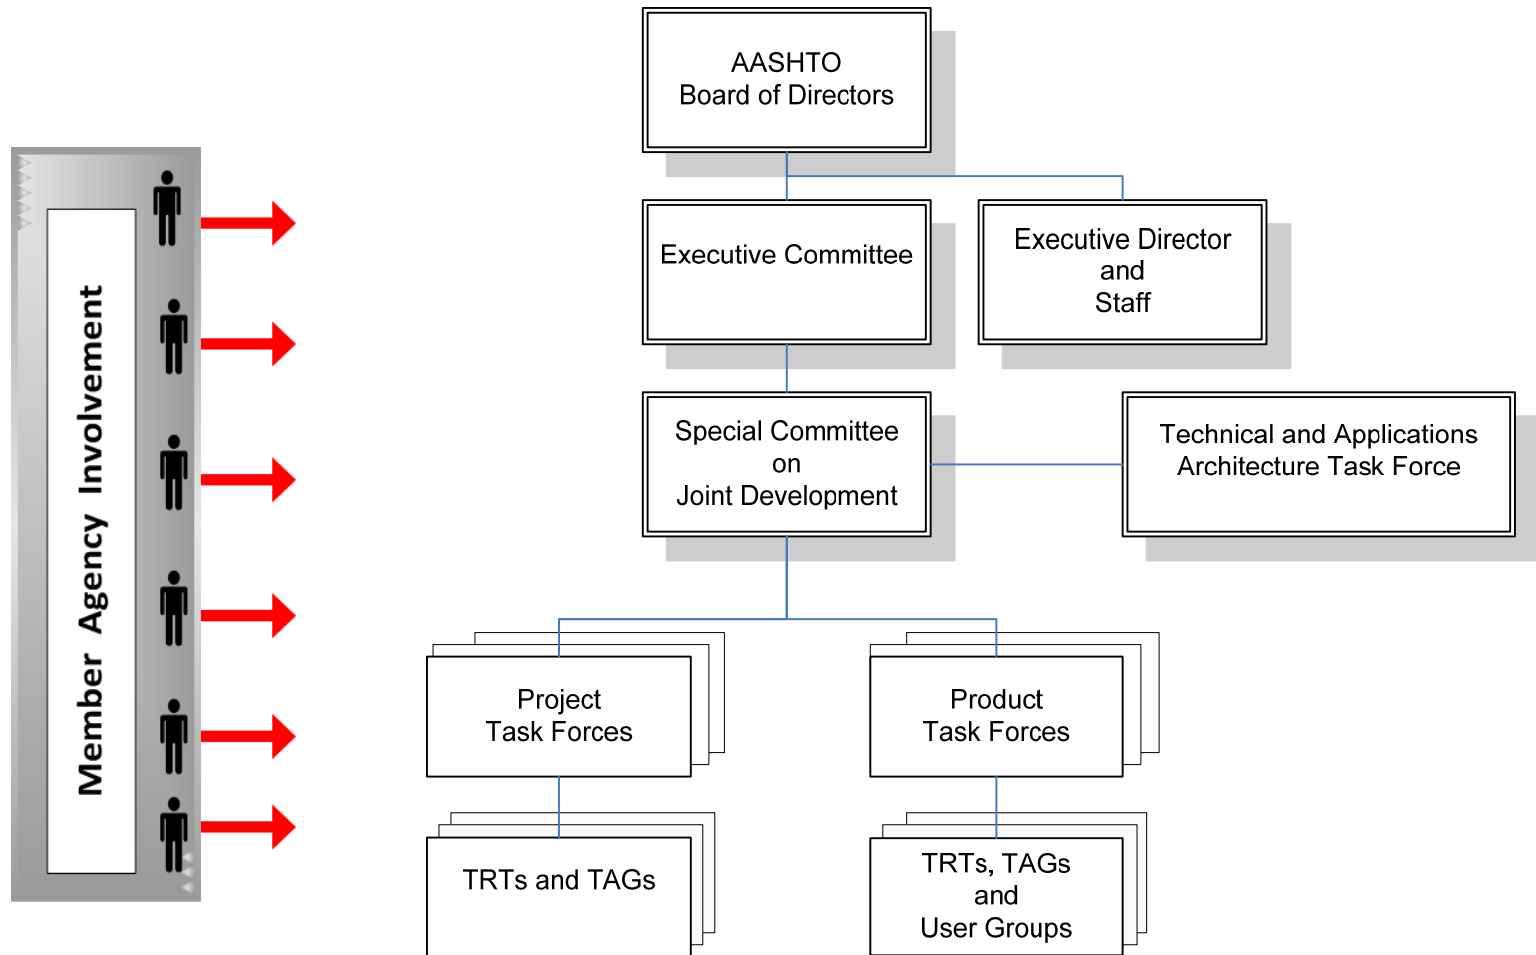

# Why Use AASHTOWare?

- Incorporates “best practices”
- Users share solutions and costs
- License fees cover overall expenses ensure software products are kept current with technology and functional requirements
- Each product is self-supporting
- Non-profit operation
- Management and oversight by agency (DOT) personnel
- AASHTO staff project management/assistance

# AASHTOWare Program Management

# AASHTOWare Capitalization

- 5% of Revenues
  - Governed and controlled by the AASHTO Executive Committee
  - Covers risks associated with software development
  - Provides seed money for new projects
  - Covers legal expenses associated with trademark activities and third-party testing
  - Supports the National Transportation Marketing Campaign (Federal Transportation Bill)
  - Funded the AASHTOWare Rebranding Effort
  - Support for AASHTOWare Research Efforts

# AASHTOWare Branding and TradeMark Guidelines

# Brand Identity

AASHTOWare Branding and Trademark Guidelines have been established to ensure the strength of our brand is maintained

- Internal Communication –
  - Task Force Meeting discussion
  - Task Force / Licensee Emails
  - SharePoint workspace folders and files
  - Internal presentations at Task Force and User Group Meetings
  - User Group websites, etc.

# Brand Identity

- **External Communication –**  
communication to groups outside the AASHTOWare community, including other AASHTO committees, AASHTO member agencies and the public
  - Presentations
  - Advertisements
  - Product Brochures
  - Product Newsletters
  - AASHTOWare Website, etc.

# Brand Identity - Naming

- Full Name (External)
  - AASHTOWare Bridge Management™
- Abbreviated Name (Internal only)
  - BrM

Strictly speaking, a trademark should always be used as an adjective, never as a noun or verb; however, if the product name is used repeatedly, the full name should be presented every time, but the name may be used as a noun

# AASHTOWare Service Units

A Brief Overview

# AASHTOWare Service Units

- Allow agencies to obtain convenient access to services provided by the AASHTOWare contractor
- AASHTO serves as facilitator by accepting the commitment for contractor-provided services, invoicing and receiving payment from the agency and forwarding the order to the contractor for the appropriate number of service units.
- AASHTO makes payment for services rendered to the contractor following agency approval of the invoice.
- Service units remaining at the conclusion of a fiscal year are carried forward into the next fiscal year.

# AASHTOWare Service Units

- Assist the licensee in the implementation of AASHTOWare products
- Provide consultation and support to incorporate customized enhancements

# Service Unit – Example Activities

- Support agency implementation of the software
- Develop agency-specific features within the system
- Develop custom reports
- Provide specialized training in the use of the products
- Update prior releases of product databases
- Fund an agency's contribution to software development projects / solicitations

# Service Unit – Example Activities

- Support common software enhancements unfunded through product licensing fees that will become part of the code base and will be supported by Maintenance, Support and Enhancement (MSE) costs
- Incorporate analytical or specification engines into AASHTOWare products

# Use of Service Units

- May not be used to provide reimbursement for travel expenses by agency personnel
- May be converted to provide additional enhancement funding under the guidance of the Task Force.
- Should not be used for work involving major new software development by member agencies.
- Activities may require more than one Service Unit each, depending on the scope of the effort defined

## Fee for Service Units

- Service Units can be ordered in unit increments of \$11,600 (this fee includes AASHTO administrative costs).
- Each service unit provides \$10,000 in routine contractor services.
- Service Units must be paid upon receipt of the invoice.

# Service Units – Routine Use

<b>86.2</b>	the percentage of the Bridge Products Service Unit fee directly allocated to the software service provider
<b>8.8</b>	the percentage of the Bridge Products Service Unit fee used to offset AASHTO internal administrative costs
<b>5.0</b>	the percentage of the Bridge Products Service Unit fee dedicated to support the Cooperative Development Capitalization Fund as required by governing policy approved by the Board of Directors

## Hosting and Add-On Service Units

- Hosting and maintenance of 5.2.X on contractor servers
- Purchase of approved plug-in modules for 5.2.X (as they become available)
- Ordered in unit increments of \$3,000
- Each HAO Service Unit provides \$2,500 in contractor services
- HAO Service Units must be paid upon receipt of the invoice.

# Service Unit Process

- Partnership between requesting agency, Task Force and contractor.
- Task Force approval to ensure contractor resources are available.
- Analyze opportunities for collaboration between agencies and Task Force product work plans.

# www.aashtoware.org

## Service Unit Procedures

The screenshot shows the AASHTOWare website interface. At the top, the browser address bar displays the URL <http://www.aashtoware.org/Pages/Public-Downloads.aspx>. The website header includes the AASHTOWare logo and a navigation menu with items like 'About AASHTO', 'Bookstore', 'Software', 'Meetings', 'Committees', 'Programs', 'Newsroom', and 'Resources'. A search bar is also present.

The left sidebar contains a list of links: 'About AASHTOWare', 'Catalog', 'Software Accessibility', 'Software Requests', 'Standards and Guidelines', 'Task Force Resources', 'Public Downloads' (circled in red), 'Downloads', 'Project Solicitations', 'RFPs/RFIs', 'FAQ', 'Sign In', and 'Register'. Below this is a video player with the AASHTOWare logo.

The main content area is titled 'Public Downloads' and lists 'AASHTOWare Administrative Documents':

- AASHTOWare Policies, Guidelines & Procedures (PG&P) - July 2013
- Travel Reimbursement Claim - As of January 6, 2014
- AASHTOWare Task Force Handbook - October 2009
- AASHTOWare Service Unit Procedures - June 2013 (indicated by a red arrow)
- AASHTOWare Strategic Plan - April 2008
- AASHTO End User Designee (EUD) Responsibilities Document
- AASHTOWare Brand Standard
- AASHTO Business and Travel Policy - June 2013
- AASHTOWare Branding and Trademark Guidelines - July 2013

Below this list are 'Administrative Subcommittee on Information Systems (ASIS) Documents':

- ASIS Charge Statement

The bottom of the screenshot shows the Windows taskbar with various application icons and the system clock displaying 4:56 PM on 9/12/2014.

# 2014 Bridge Management Customer Satisfaction Survey Results

Conducted July 29 – September 5, 2014

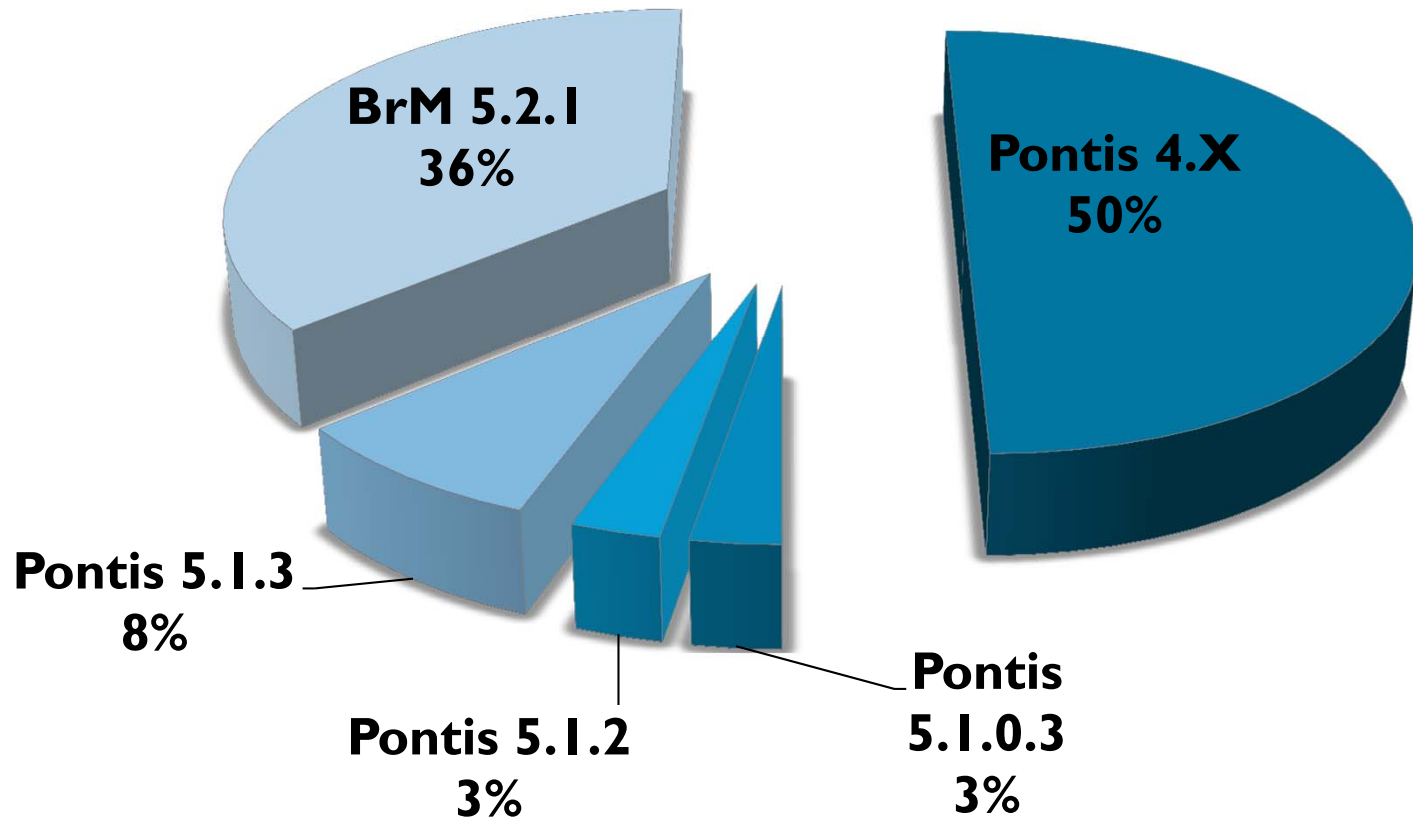

# Survey Participation

- **37 Responses** (55 in 2013)
  - **33 member agencies** (46 in 2013)
  - **4 consultants** ( 9 in 2013)

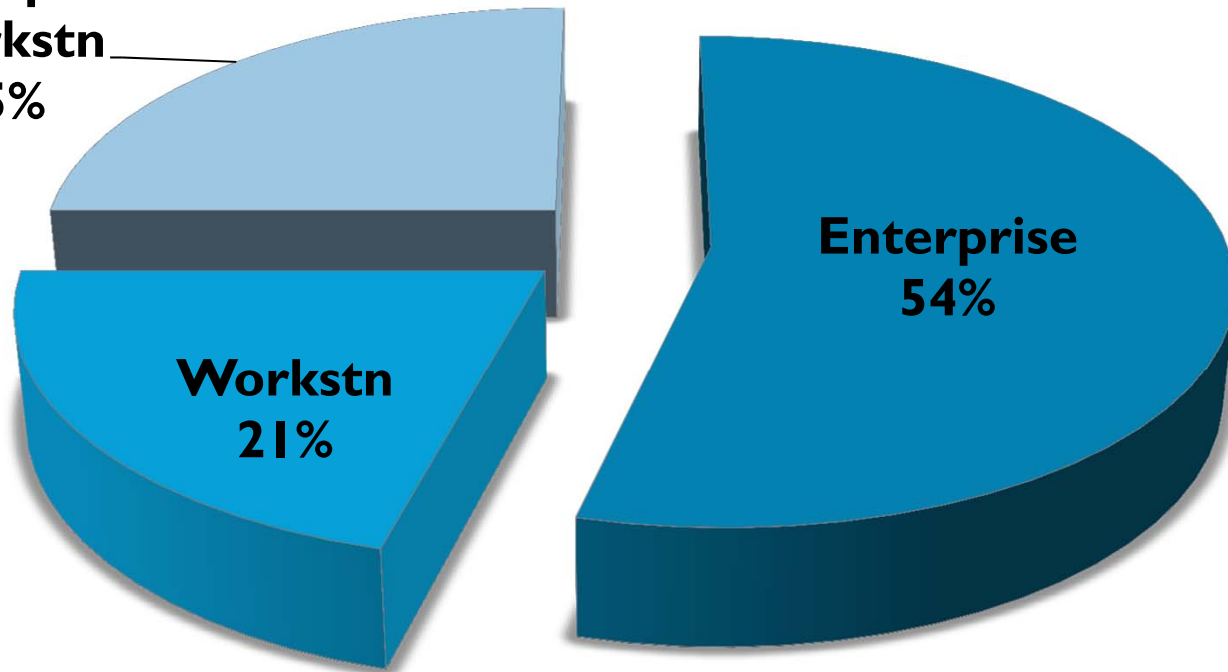

# Software Version Used

If you are using version 5.X, which platform are you using?

**Both  
Enterp &  
Workstn  
25%**

# Workstation Operating System

# Server Environment

If you are not currently using 5.2.1, do you plan to move to version 5.2.1 in the next year?

## What do you need to start using 5.2.1? (1 of 2)

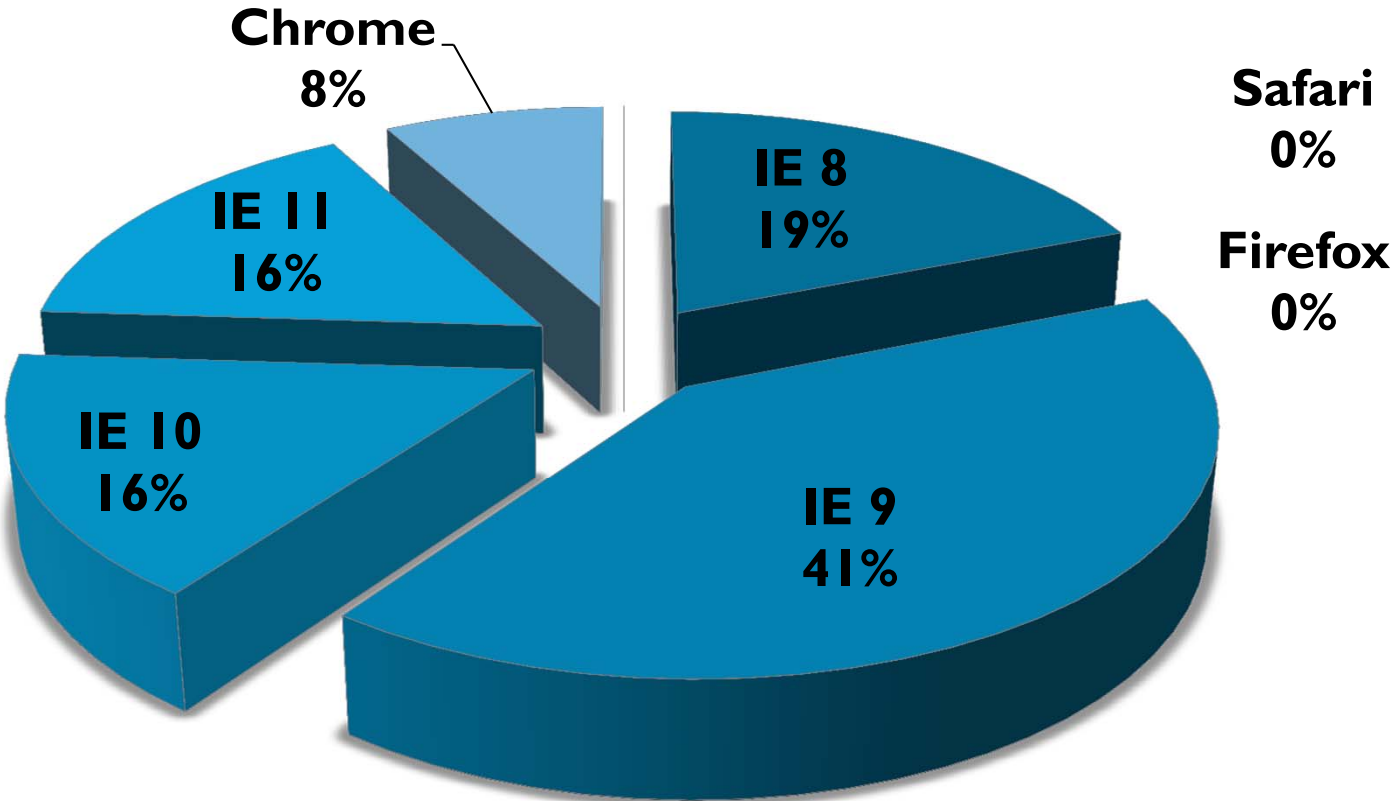

- DOT requires heavy customization for BrM usage. Several data entry/display screens for the user table data must be created. We also have over 200 reports from 4x which must be recreated for 5.2.1.
- Need to get it downloaded and installed.
- The system must accommodate more than two users. The original vision document for 5.X was 20 concurrent users.

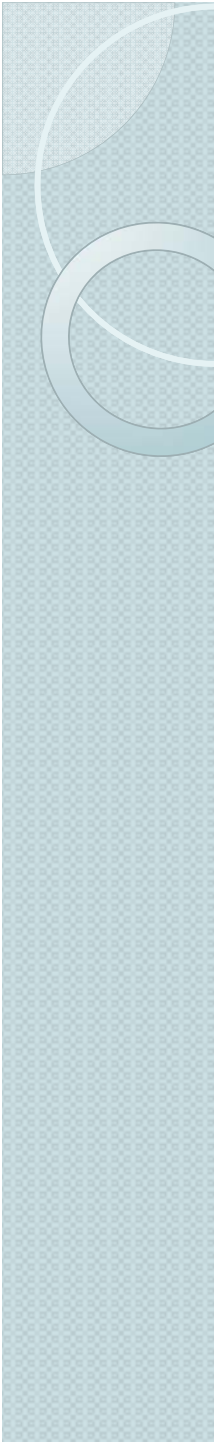

## What do you need to start using 5.2.1? (2 of 2)

- Need the state DOT to start using 5.2.1.
- The gateway module is not working. We cannot import any files using xml, pdi or nbi import.

# Web Browser Used

## If using IE 8-10, when do you plan to upgrade to IE 11?

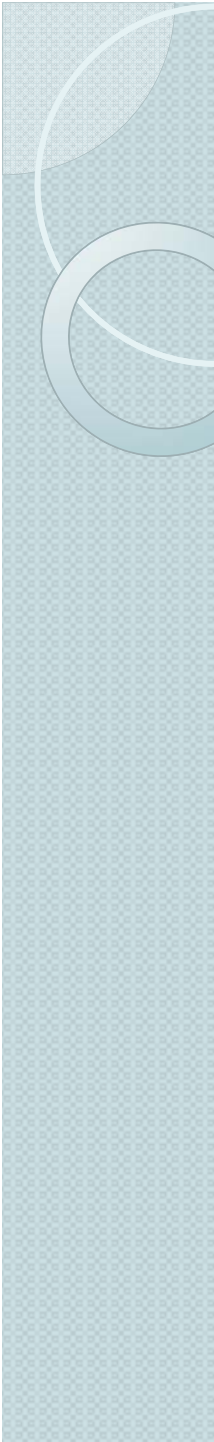

- Unknown (10)
- Sometime in 2015 (5)
- When IE11 compatibility issues are resolved (4)
- Decision made by the IT organization (2)
- Far in the future (2)
- Sometime in 2014
- In Progress
- DOT doesn't support IE11

# Element Data Collection

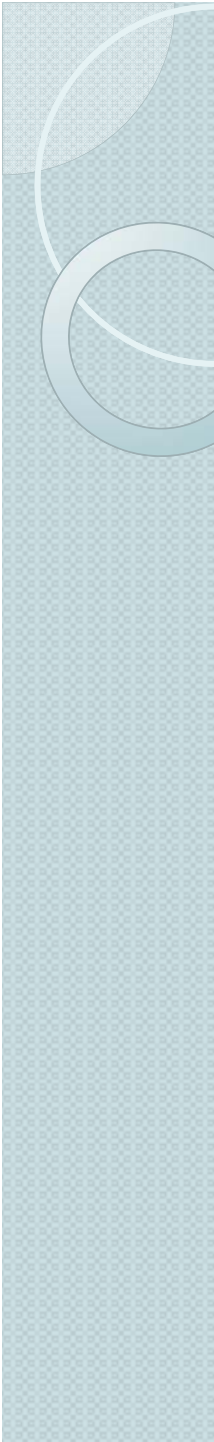

# Number of BrM Users

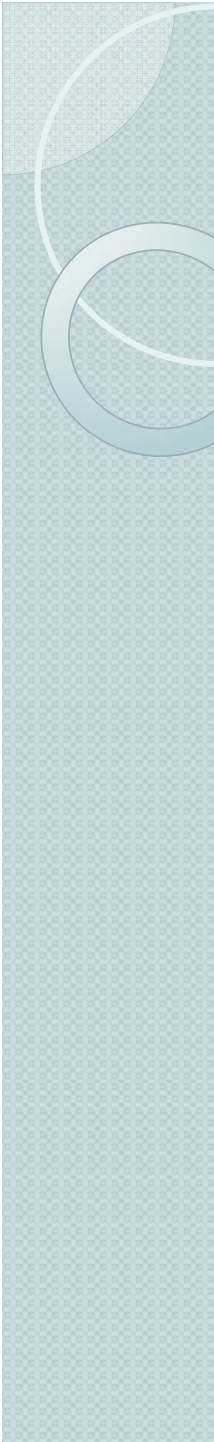

## Most Significant Bridge Management Challenge? (1 of 3)

- Time to train users (4)
- Implementation of agency customizations (3)
- Data migration to element data (3)
- Deterioration modeling (3)
- Getting 5.2.1 to work properly/stable (3)
- Compliance with NBIS (2)
- Confidence in forecasting structurally deficient bridges for budget projections

## Most Significant Bridge Management Challenge? (2 of 3)

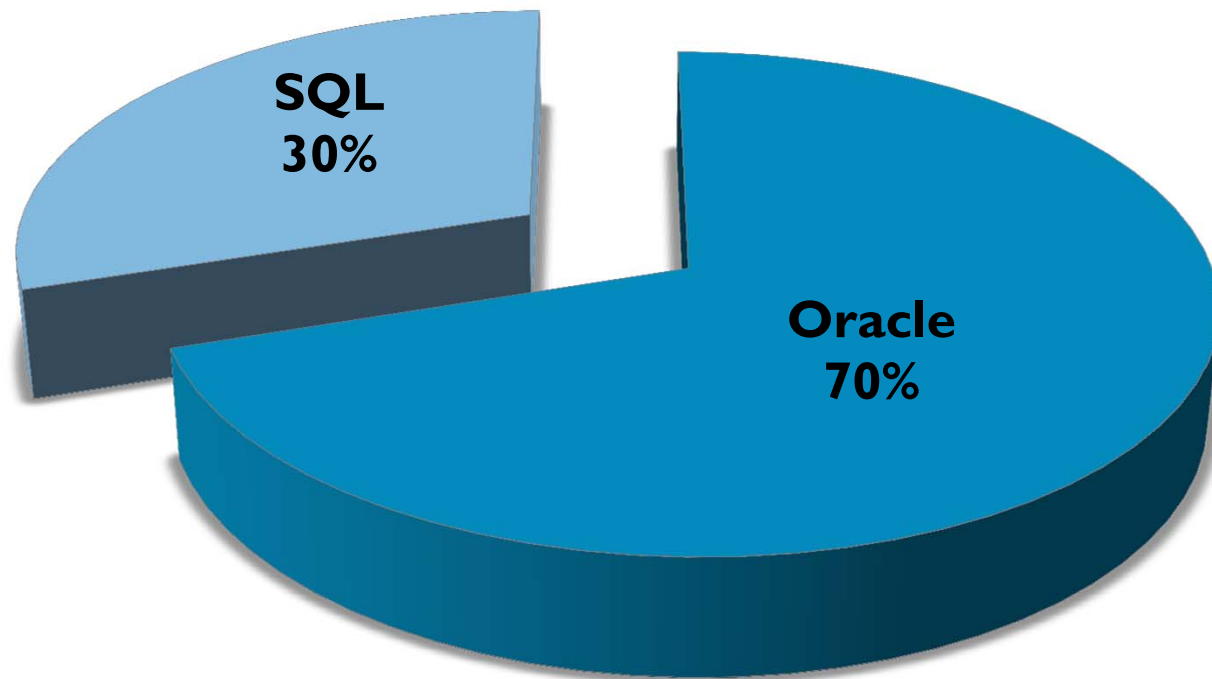

- Implementation of new versions and availability of technical support
- Data-driven asset management
- Data integrity and security
- Implementing element inspections
- Asset management module is not yet available
- End user and installation documentation

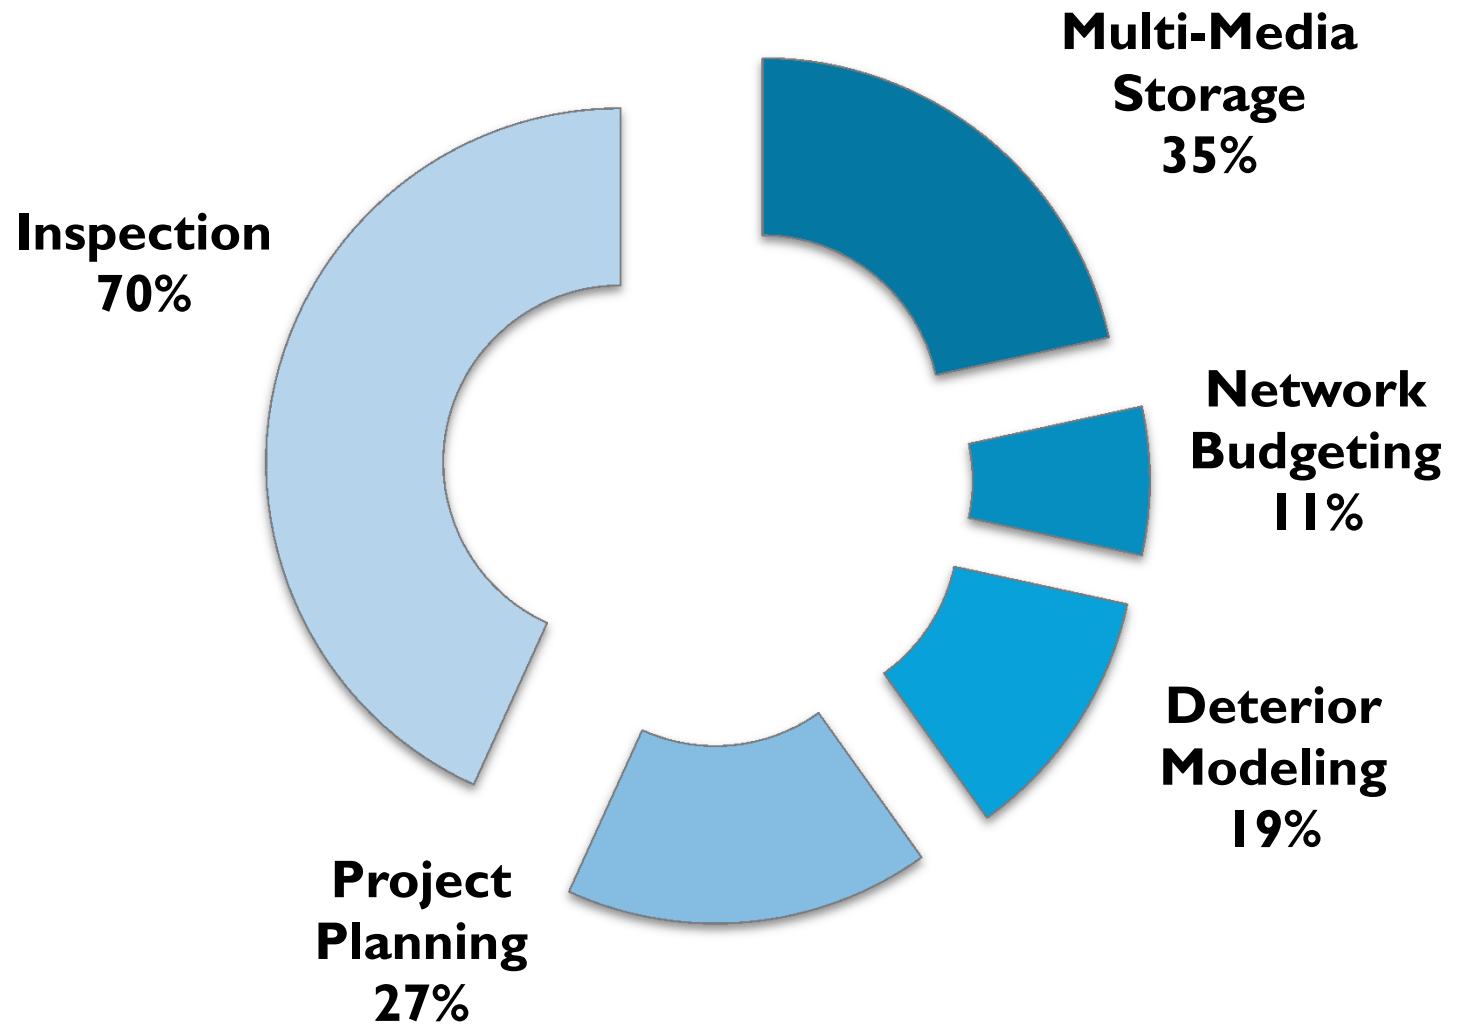

## Most Significant Bridge Management Challenge? (3 of 3)

- BrM's inability to support a large number of users
- Software performance
- Sufficient employee resources
- Limited agency funding
- Overcoming agency procurement bureaucracy
- Have not used 5.2.1

# Database Used

# Features Used

# Use of 'Previous Date' Field

- Record Last Inspection Date (15)
  - Manually enter the previous date to reflect the inspection just performed. Do not trust the date provided by BrM.
- Do Not Use this Field (6)
  - Doesn't work correctly
- Calculate the Next Inspection Date (3)
- Enter the Date of the Current Inspection
- Check for inspection compliance

## Use of 'Next Date' Field (1 of 2)

- Record Next Scheduled Inspection Date (16)
  - Relevant inspection type based on inspection frequency and the previous date
  - Next routine inspection
  - Manually enter the next date based on the most recent inspection. Do not trust the date provided by BrM.
  - Next date = inspection + frequency
- Schedule inspectors (3)

## Use of 'Next Date' Field (2 of 2)

- Do Not Use this Field (3)
- Check for inspection compliance
- Allow Pontis 4.X to update it automatically

# Inspection Software Used (if not using BrM)

**InspectTech**  
**2**

**In-House  
Software**  
**6**

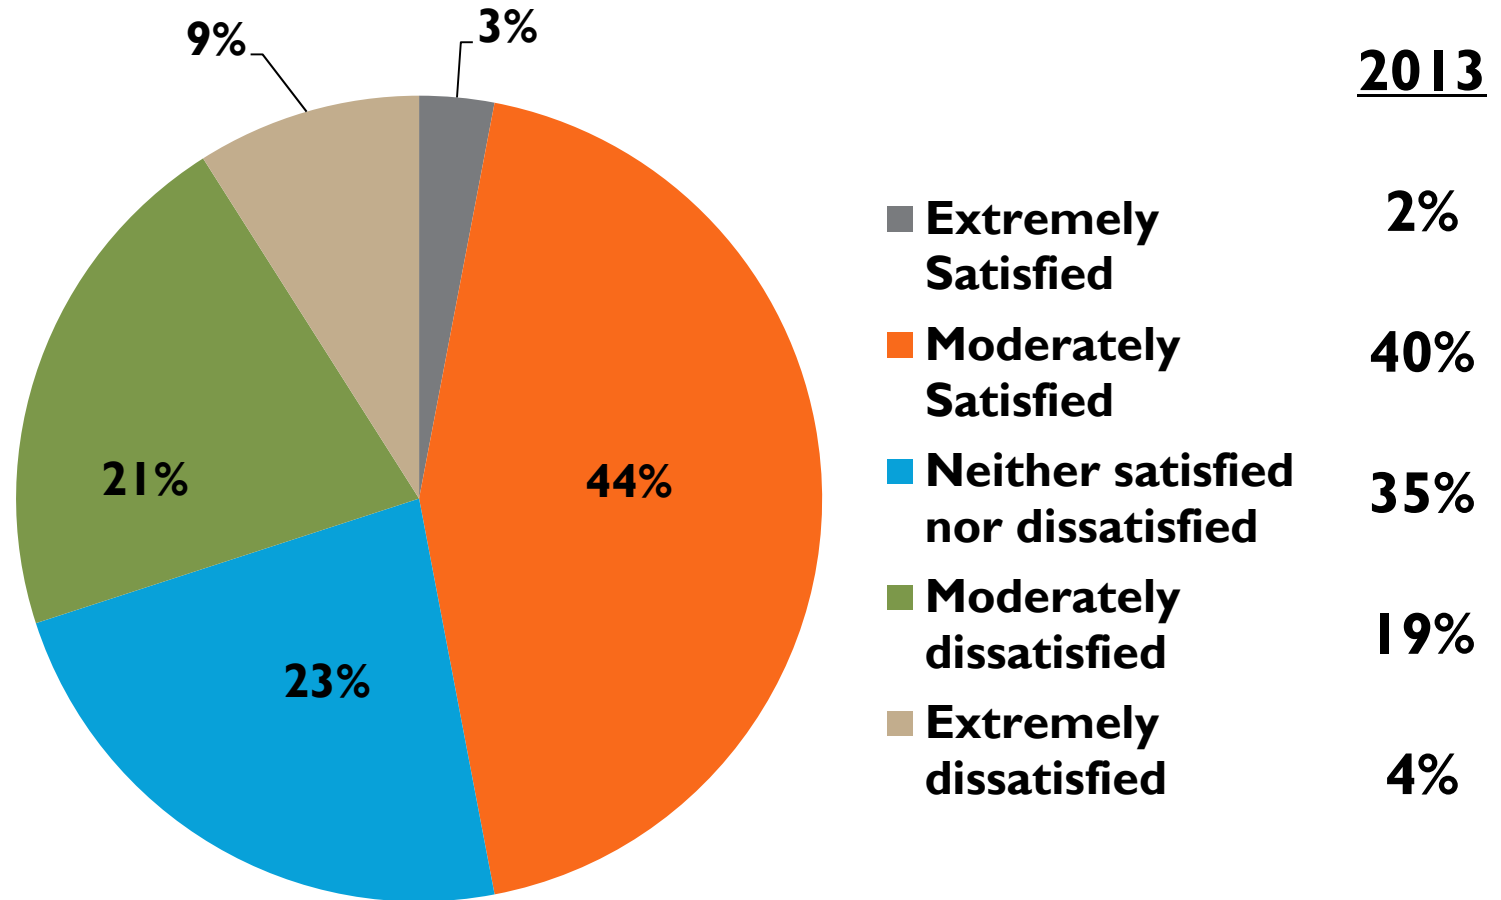

# Ease of Installation

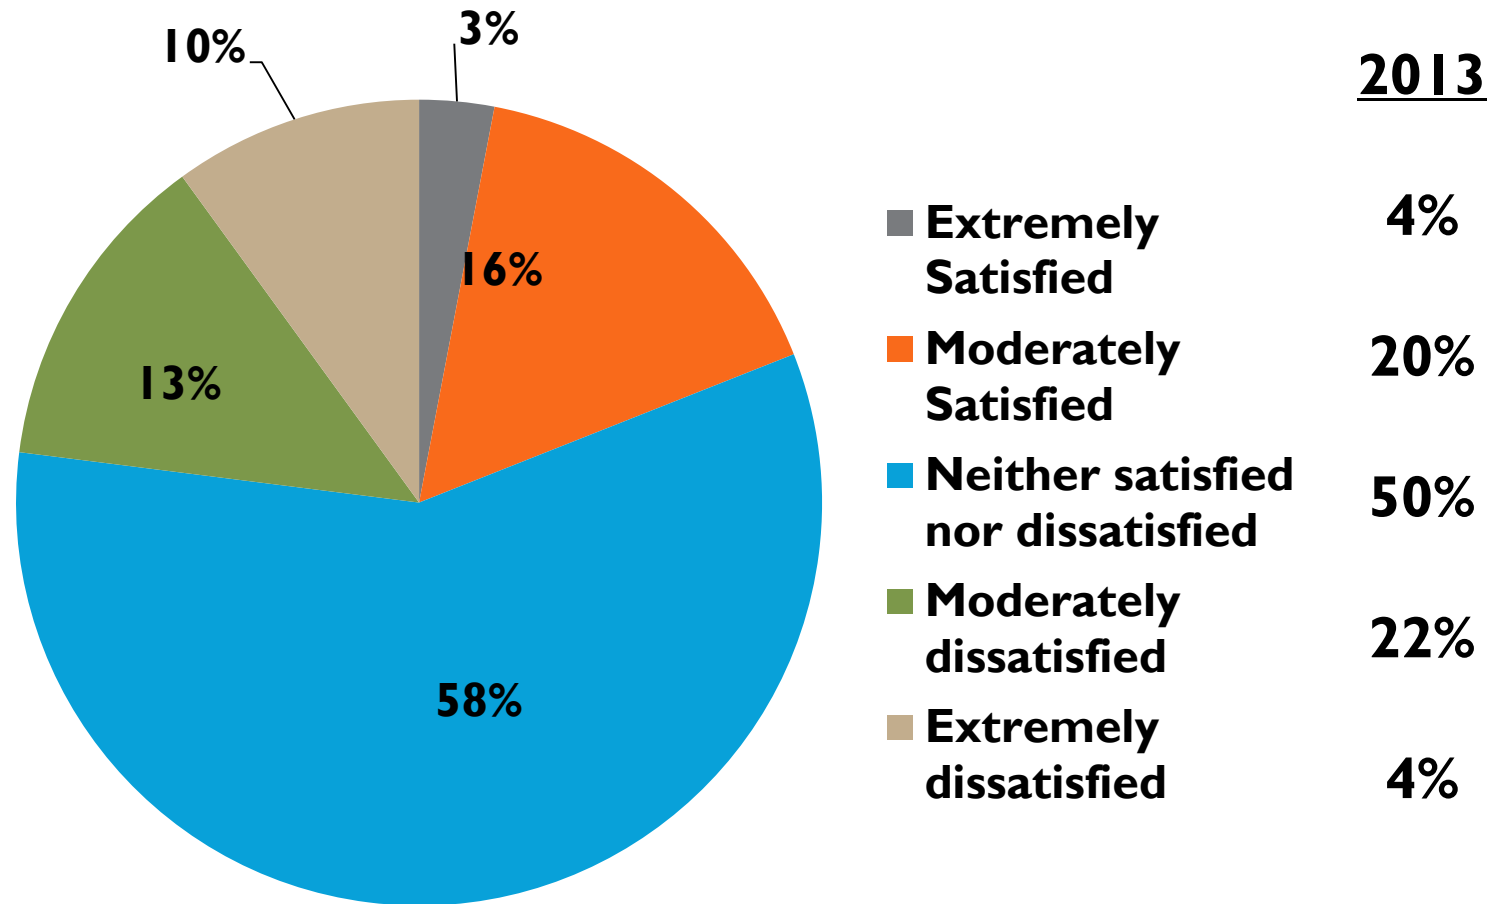

**2013**

■ Extremely Satisfied	2%
■ Moderately Satisfied	50%
■ Neither satisfied nor dissatisfied	27%
■ Moderately dissatisfied	15%
■ Extremely dissatisfied	6%

# Software Operation (speed, ease of use, reliability)

# Analysis Features of Pontis 4.X

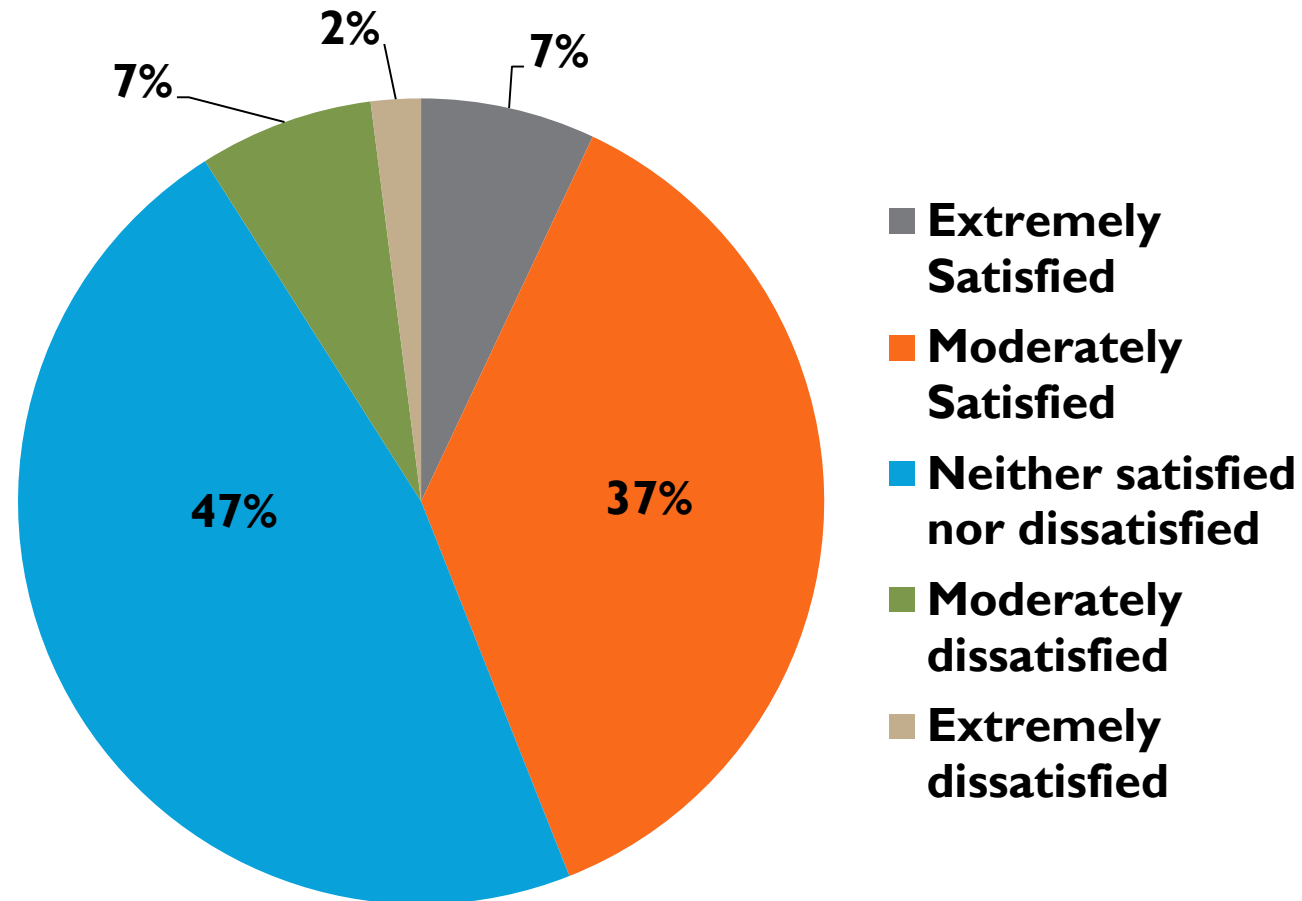

# Inspection Features of Pontis 5.1.2 / 5.1.3

# Inspection Features of Pontis 5.2.1

# Reports (delivery, quality and completeness)

**2013**

■ Extremely Satisfied	2%
■ Moderately Satisfied	23%
■ Neither satisfied nor dissatisfied	49%
■ Moderately dissatisfied	20%
■ Extremely dissatisfied	6%

# Enhancements to support using features not currently using (1 of 3)

- 5.2.1 is very slow and buggy (3)
- Easier customization to add state requirements (3)
- Application should work – Get 5.2.1 stable – correct memory issues
- GUI Makeover
- Multimedia needs to be able to interface with corporate document management system to be practical and useful

## Enhancements to support using features not currently using (2 of 3)

- Limited functionality – unable to scroll up or down one bridge while in inspection module (very cumbersome)
- API
- Better documentation of features and how to use them – explain deterioration, risk and utility functions – explain generic IIS requirements and setup instructions
- 5.2.x project needs to be completed

# Enhancements to support using features not currently using (3 of 3)

- Unit cost of work candidates to store decimal points (cents)
- Ability to group work candidates into projects
- Deterioration modeling
- Inspection and Utility function

# Comments on Software Use

## (1 of 3)

- 5.2.1 is too slow and is unstable at times (2)
- Post backs need to be minimized
- More timely technical support
- Every 'improvement' causes the program to be slower and more complicated
- Question 14 lists deterioration modeling which is not included in 5.2.1
- Report creation takes too long and the output file (both .doc and .pdf) are too large

# Comments on Software Use

(2 of 3)

- Making use of agency fields and the user tables is tedious and difficult – agency tab generator doesn't work when trying to work with roadway data
- BrM needs to keep up with Microsoft operating system and database updates
- BrM needs to be a 64-bit program
- Waiting for a robust API to add their internal data to the application database.
- Risk-based data input for future modeling

# Comments on Software Use

(3 of 3)

- Incorporate import of full element specifications: condition state language, defect definitions, material definitions, categories, types, etc.
- Expand the size of the Inspection Notes field
- DOTs are expecting a true bridge management software – expect AASHTO to deliver a system that works and meets their needs
- The program is getting much better
- Waiting for functionality of 5.2.3

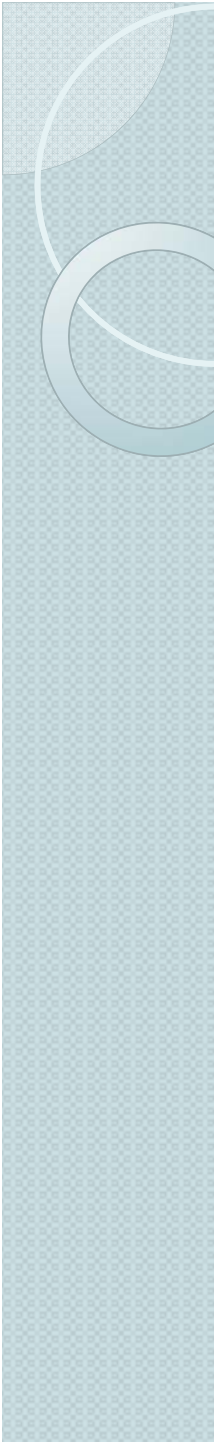

# Use of Technical Support from Bentley - 74% of respondents

	Extremely satisfied	Moderately satisfied	Neither satisfied nor dissatisfied	Moderately dissatisfied	Extremely dissatisfied
a) quality of the support provided	<b>19%</b> 40%	<b>54%</b> 32%	<b>8%</b> 25%	<b>15%</b> 8%	<b>4%</b> 0%
b) contractor communication and follow-up	<b>23%</b> 28%	<b>50%</b> 40%	<b>8%</b> 16%	<b>11%</b> 16%	<b>8%</b> 0%
c) effectiveness of contractor telephone & e-mail support	<b>31%</b> 28%	<b>31%</b> 36%	<b>15%</b> 24%	<b>15%</b> 12%	<b>8%</b> 0%
d) knowledge of the contractor help desk staff	<b>23%</b> 40%	<b>46%</b> 24%	<b>12%</b> 32%	<b>19%</b> 4%	<b>0%</b>
e) overall quality of contractor problem resolution	<b>16%</b> 32%	<b>44%</b> 32%	<b>20%</b> 24%	<b>12%</b> 12%	<b>8%</b> 0%

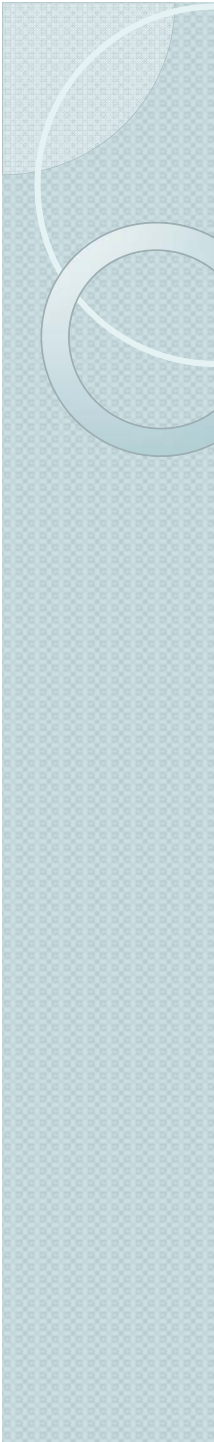

# Use of Development or Custom Technical Support - 20%

	Extremely satisfied	Moderately satisfied	Neither satisfied nor dissatisfied	Moderately dissatisfied	Extremely dissatisfied
a) quality of the support provided	<b>0%</b> 14%	<b>86%</b> 14%	<b>14%</b> 14%	<b>0%</b> 8%	<b>0%</b>
b) contractor communication and follow-up	<b>0%</b> 57%	<b>57%</b> 29%	<b>29%</b> 14%	<b>14%</b> 0%	<b>0%</b>
c) effectiveness of contractor telephone & e-mail support	<b>0%</b> 57%	<b>86%</b> 29%	<b>14%</b> 14%	<b>0%</b>	<b>0%</b>
d) knowledge of the contractor help desk staff	<b>29%</b> 57%	<b>57%</b> 29%	<b>14%</b> 14%	<b>0%</b>	<b>0%</b>
e) overall quality of contractor problem resolution	<b>0%</b> 57%	<b>86%</b> 29%	<b>14%</b> 14%	<b>0%</b>	<b>0%</b>

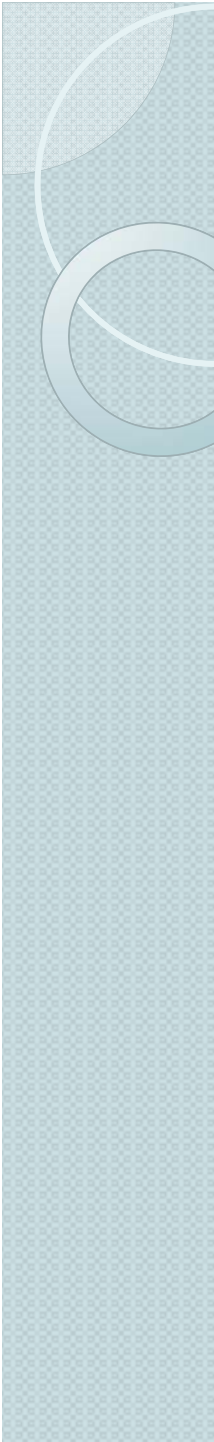

# Comments on Contractor Support (1 of 3)

- Waiting on support for basic Pontis 4.2 functionality as well as answers regarding 5.2
- Timeliness and thoroughness seem to be a general issue. - It takes forever to hear back
- Need to setup a better process for using Bentley development and customization services – need to know who to get it going
- Response time has decreased since Bentley took over

# Comments on Contractor Support (2 of 3)

- Customizations for our DOT were planned in advance and we were assured they would be ready for implementation in May; however, these were still not complete in August
- Contractor is cooperating but the application needs a lot of improvement
- Relationship with AASHTO and Contractor does not protect agency when using Service Units
- Since last year, the overall development, support and customization has improved a lot

# Comments on Contractor Support (3 of 3)

- JIRA is a pain
  - Previously reported issues cannot be searched to save time
  - Notifications to support requests only work about half the time – users must check JIRA every day to see if questions or responses have been posted
  - Too much Bentley internal communication is stored in JIRA – users shouldn't have to wade through the Bentley internal discussions in JIRA

# Exposure to Pontis 5.2.1 Documentation

# Pontis 5.2.1 Documentation Quality

**2013**

■ Extremely Satisfied	<b>0%</b>
■ Moderately Satisfied	<b>29%</b>
■ Neither satisfied nor dissatisfied	<b>58%</b>
■ Moderately dissatisfied	<b>13%</b>
■ Extremely dissatisfied	<b>0%</b>

# Pontis 5.2.1 Documentation Usefulness

**2012**

■ Extremely Satisfied	<b>0%</b>
■ Moderately Satisfied	<b>14%</b>
■ Neither satisfied nor dissatisfied	<b>59%</b>
■ Moderately dissatisfied	<b>18%</b>
■ Extremely dissatisfied	<b>9%</b>

# Comments on Documentation (1 of 2)

- Technical and user manuals need to be completely up to date
- Needs a complete redesign and rewrite
- Manuals need to be updated for an agency to select and derive basis for developing risk, utility functions, etc.
- More detail on customization is needed (who, what, when, where, and how) – what happened to the technical writer that Bentley said they hired last year?

# Comments on Documentation (2 of 2)

- Customization/configuration and general usage documentation is out of date and not useful
- The technical guide was easy to find but it took a while to find the user guide
- Is there a 5.2.1 Technical Manual?
- Include more tactical information on setup
- Installation documentation is fairly complete
- Big improvement over previous versions

# Participation in Contractor-led Webinars

# Webinar Participation (number of webinars attended)

# Webinars

	Extremely satisfied	Moderately satisfied	Neither satisfied nor dissatisfied	Moderately dissatisfied	Extremely dissatisfied	Don't Know
a) Quality	<b>16%</b> 28%	<b>60%</b> 46%	<b>16%</b> 23%	<b>4%</b> 3%	<b>0%</b>	<b>4%</b> 0%
b) Length	<b>20%</b> 31%	<b>68%</b> 33%	<b>8%</b> 33%	<b>0%</b> 3%	<b>0%</b>	<b>4%</b> 0%
c) Frequency	<b>4%</b> 17%	<b>48%</b> 25%	<b>28%</b> 44%	<b>12%</b> 14%	<b>4%</b> 0%	<b>4%</b> 0%
d) Recordings	<b>17%</b> 17%	<b>46%</b> 22%	<b>17%</b> 47%	<b>0%</b> 3%	<b>0%</b>	<b>20%</b> 11%

# Webinars - Usefulness

# Comments on Webinars (1 of 2)

- Recording the webinars is great – allows users to watch them later
- More walk-through on modules and their setup
- I'm the end user designee; however, I never receive notifications on webinar schedules
- Many webinars are too high level and shallow in content
- More 'how to' instructional webinars are needed

# Comments on Webinars (2 of 2)

- Future Topics:
  - Using the Multimedia Tab (with media on a network drive)
  - Writing Crystal Reports
  - Creating Forms
  - Data Collection
  - Customizations
  - Integration
  - Synching BrR and BrM
  - Deterioration Module webinar on programming, developing costs, deterioration, etc.

# Agency / Task Force Contact

# Task Force Responsiveness

# Suggestions for Improvement Agency / Task Force

- Task Force needs to focus on making the software more usable
- More work on how to set up the custom agency tab
- More information on how to have work done by Bentley
- Some follow-up on issues would be helpful
- We don't have much interaction with the Task Force

# User Group / Task Force Relationship

# Suggestions for Improvement User Group / Task Force

- TAG and TRT members should be invited to the BrMUG Meeting (AASHTO Reimbursed travel?)
- Things have improved – continue to listen to the users
- Task Force needs to consider end user wants/needs higher than the cost of the requested changes
- Communication with contractor – Bentley needs to improve on their Service Unit work

## Specific Issues / Concerns (1 of 2)

- Speed up the software (2)
- Our agency is not satisfied with the contracts in place for Service Unit work
- Need better coordination with other AASHTOWare products (specifically, Project)
- The move to 5.2.1 from 4.5 is very painful
- BrM should be available for remote hosting
- BrM requires Crystal Reports (2008, SP2) – BrM should be continuously evaluated for compatibility with new releases of support software; or provide a method to obtain the specific version required

## Specific Issues / Concerns (2 of 2)

- For Version 5.2.1
  - Agency custom fields can currently only be text fields or drop-downs –date fields are needed (putting a date in a text field crashes BrM)
  - Ability to add agency custom fields to all tabs and have them access the User Tables – currently this only works for the roadway tab
  - Ability to modify the inspection status outside of the four pre-set options – this is needed to meet our workflow
  - Three User Tables with different functions – they don't update or reference each other

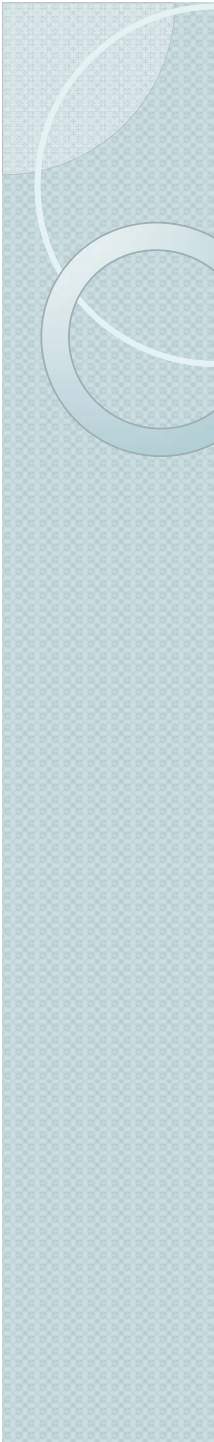

# Follow-up Actions

- **AASHTOWare Bridge Task Force Meetings (September 18 and October 28-29, 2014)**
  - Review the detailed results of the survey
  - Discuss opportunities for improvement
  - Assign action items to implement changes
  - Incorporate changes into FY15/16 work plans as appropriate
- **Special Committee on Joint Development (January 22-23, 2015)**
  - Bridge Management survey results presented/discussed

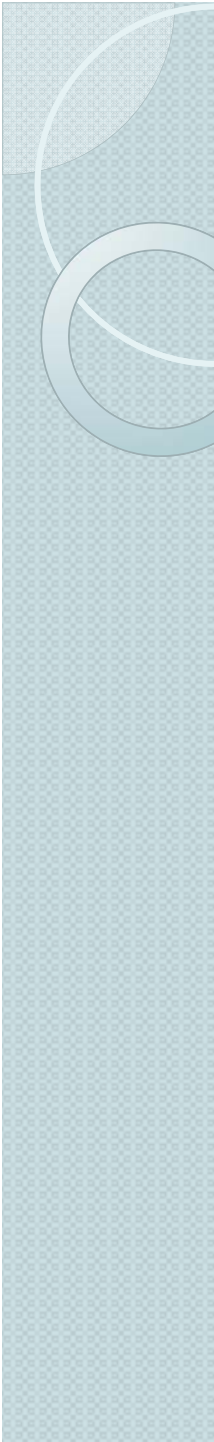

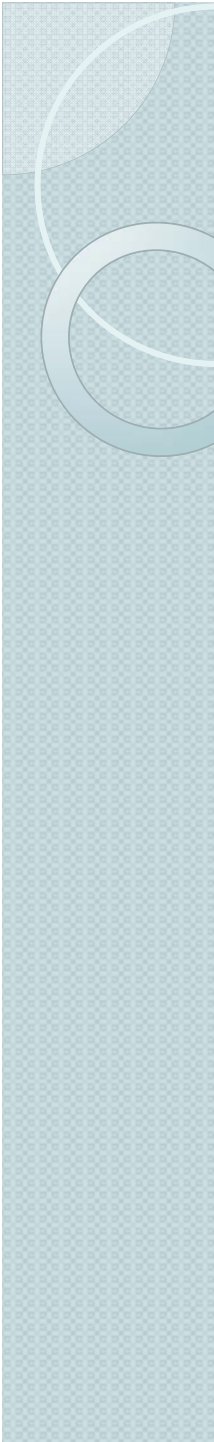

# Travel Expenses (AASHTO Reimbursement)

- One representative per **AASHTO Member** agency licensing the Super Site License
- **Receipts are REQUIRED for all reimbursable expenses regardless of the amount.**
  - Original receipt
  - Debit/credit card transaction record or statement of account is not acceptable

## Travel Expenses (AASHTO Reimbursement)

- Meals during the conference (i.e., Breakfast and Lunch on Tuesday and Wednesday) are provided by the conference.
- Other meals reimbursed at actual cost with maximum reimbursement limited to an average not to exceed \$45 total per day. **(receipts required)**

# Travel Expenses (AASHTO Reimbursement)

- Sign the travel expense form
- Scan the form and all receipts
- **Email** to Judy Skeen  
[jskeen@aaashto.org](mailto:jskeen@aaashto.org)
